Stretch GOLD bale wrap

Layers	7
1mil	30" x 5000'
1.5mil	30" x 3300'

After years of continuous research and development, we created the world's first oxygen barrier stretch film — a material that combines the advantages of our oxygen barrier technology with strength, consistent performance, and durability.

Independent oxygen permeability tests demonstrate that SealPlus **STRETCH GOLD delivers an OTR (Oxygen Transmission Rate) 100 times better** than conventional stretch films available on the market.

It can be used on both round and square bales and is suitable for wrapping any type of crop. Compatible with all types of bale wrappers, it can also be used in combination with traditional stretch film to optimize cost efficiency and preservation quality.

Chemical analysis results from trials conducted in collaboration with the University of Bologna have demonstrated the stability and quality of alfalfa forage, showing very low protein degradation and improved digestibility.

UV RESISTANT

LONG-LASTING PERFORMANCE IN ALL CONDITIONS

EVOH OXYGEN BARRIER O_2

MAXIMUM PROTECTION AGAINST AEROBIC OXIDATION

100%

100% RECYCLABLE
